Milk flavouring straws

# MyStraw

Our company, MC Scotland Export-Import Ltd. has been handling the production of Milk flavouring straws since 2005, continuously fulfilling the requirements of the market.

Our company is located in Hungary, but you can find our products anywhere in the World.

Our production technology is unique and legally protected: the straws are produced on an automatic production line.

We have one of the highest food safety certifications in Europe: the IFS 6 (International Food Standard), which we renew every year.

## Product Description

### Milk flavouring straws

Our products make milk more fun – children everywhere love them. Therefore they are more willing to drink at least one glass of milk, which is important for their health and growth.

The product is a straw, which has similar formation like normal straight straw has, but it contains flavoured beads that magically transform milk into fun. Our most popular flavours are chocolate, vanilla, strawberry and banana, while we also have many other flavouring options to meet our customer's needs.

Thanks for the technological development in 2011, our straws have been being produced without filter parts. In this way the product is totally safe, the ends of the straws are made in a special way to avoid the beads falling out, and they do not contain moving parts anymore.

#### How to use

Put the straw into a glass of room temperature milk (about 200 ml) and enjoy the amazing flavours! Children under 3 years can use only with parental supervision!

#### The straws are:

- All natural: no artificial flavours, colours or preservatives
- Gluten free
- Lactose free
- GMO-free
